 - As of right now there has been no conversation, but if the plan follows through we can definitely have a conversation about it
 - Lara asked “[If] all the cardio machines that are being replaced by the spin class and rejuvenation area, they’ll be moved to the upstairs levels?”
 - Yes they will be moved to a different location, but we are planning to have more strength machines versus cardio
 - Nikki asked if the staff has a preference
 - Recreation prefers the higher budget option, only because the layout overall seems the most fitting
 - Lara asked “Would the climbing wall “replace” the climbing gym like in the 2nd concept?”
 - Yes, the climbing wall would be on the 3rd and 4th floors.
 - Peyton asked “Where is the additional lifting space in [high budget] model again?”
 - The machines would move out of the existing space and we would then work to see which machines students are using more versus less.
 - Peyton asked “Is the golf simulator a hypothetical/concept?”
 - It already exists instead of RIMAC and is currently being tested by our Golf team and the engineering department. We will then work to open that space for students.
 - Lara asked about the ramp that leads to LionTree Area and if it would be impacted
 - The ramp will remain intact
